eRPortal Software Group to Present at Automation Fair 2014

The maintenance management software company will exhibit at booth 375 and present a session Thursday afternoon.

(PRWEB) November 11, 2014 -- eRPortal Software Group is proud to both exhibit and present at the Automation Fair® 2014 event by Rockwell Automation in Anaheim, CA. Edward Garibian, President of eRPortal Software Group, will present the session Implementing LEAN Maintenance Management practices using FactoryTalk® Integrated Maintenance Management Software on Thursday, Nov 20 at 1 p.m.

The presentation will show a demonstration on how eRPortal's maintenance management software can deploy alongside FactoryTalk®/PlantPAx® control system platform by Rockwell Automation enabling customers to achieve a highly LEAN, highly precise, just-in-time plant and equipment maintenance strategy.

"The eRPortal CMMS and FactoryTalk from Rockwell Automation combination gives customers the ability to create PM Schedules based on machine utilization levels," says Garibian. "Additionally, maintenance and operations chiefs will now have the ability to create an unlimited array of rules and follow-on triggers that automatically create work orders, inspection requests, and supply purchase orders anytime FactoryTalk tags (representing the current, real-time state or health of an asset) reach certain levels or go into alarm or other out- of-spec states."

The Automation Fair 2014 event will take place at the Anaheim Convention Center November 19-20. Attendees of the fair can see how to achieve faster time to market, optimize their assets, lower total cost of ownership, and improve their risk management.

"We will demonstrate how our product integrates with the Dynamix™ 2500 Vibration Monitoring system from Rockwell Automation – again, creating work orders when vibration measurements reach warning levels," says Garibian. "We also plan to exhibit how eRPortal's CMMS can populate the FactoryTalk VantagePoint EMI with relevant asset status and maintenance history data, in real-time.

About eRPortal Software Group

The eRPortal Software Group provides high performance, web-enabled, Enterprise Asset Management, Maintenance Management, and Materials Tracking software solutions for managing strategic assets and operations. Our success is built on our proven experience and our ability to understand and respond to the broad range of challenges that our customers face. We deploy technology that maximizes operations efficiencies and asset utilization levels. Our customers succeed because eRPortal software is architected for flexibility, interoperability, and user interface adaptability.
